

WATKINS BUSINESS SOLUTIONS, LLC

CAPABILITY STATEMENT

Modernize. Secure. Automate.

Principal-led Microsoft infrastructure modernization, security engineering, and automation for federal prime contractors, defense-adjacent organizations, and commercial enterprises.

CORE COMPETENCIES

Infrastructure modernization

Windows Server 2022/2025; Active Directory, DNS and Group Policy; Hyper-V; Exchange, SQL and IIS infrastructure support. Staged migrations with baseline health gates, contingency planning and validation.

Security engineering

DISA STIG implementation support, vulnerability remediation and privileged access. Centralized Windows logging, SIEM integration, PKI/CAC infrastructure and technical readiness evidence.

Automation and operational resilience

PowerShell assessment, configuration and validation; Azure Arc and hybrid management; backup and recovery planning; repeatable evidence collection, SOPs and knowledge transfer.

DIFFERENTIATORS

20+ years of principal experience

Senior systems engineering expertise with direct technical accountability.

One delivery model

Architecture, implementation, security, automation and documentation.

Evidence at every transition

Health gates, validation artifacts and objective acceptance conditions.

Built for operational handoff

Usable procedures, repeatable tooling and knowledge transfer.

REPRESENTATIVE PRINCIPAL EXPERIENCE

Enterprise Microsoft modernization: staged planning across domain services, virtualization and application infrastructure with migration sequencing and health validation.

Security compliance automation: PowerShell-driven assessment, remediation support and evidence collection aligned with DISA STIG workflows.

Logging and hybrid architecture: Windows event collection, SIEM integration, operations documentation and physical, virtual and cloud-connected infrastructure options.

ENGAGEMENT OPTIONS

Infrastructure assessment and roadmap | Modernization and remediation projects
Technical readiness and SecureBaseline | Fractional infrastructure engineering
